Specialty Medicine
with Commitment,
Care & Compassion

Open for Business October 3, 2006!

A Letter from TOC Co-Presidents Louis Libby, MD & Craig Fausel, MD

Dear Colleagues,

We are extremely delighted to announce the move into our new home at 1111 NE 99th Avenue at the Gateway Transit Center. This beautiful facility consists of 100,000 square feet and three floors of clinical space to house modern offices and space for many of the divisions of The Oregon Clinic and affiliated services. Our excitement comes from our improved ability to offer our patients the best specialty care anywhere, consistent with our tag line – *Specialty Medicine with Commitment, Care and Compassion*.

Near Completion: Oregon Clinic Gateway Building, September 2006

Patients will appreciate the easy access to this site from the major east side highways, its location adjacent to the Gateway Tri-Met station, and the 200-space parking lot. Also, patients whose complex illnesses need a team approach will benefit from the on-site presence of cooperating specialists and convenient access to ancillary services.

We initiated this project to accommodate the growth of The Oregon Clinic. As we continued through the phases of planning and design, our desire to offer the best possible specialty healthcare guided our decision-making. As construction nears completion, our vision is being realized.

We personally invite you to come and see what is now available to your patients. Our Gala Opening Night Party will be held on **Friday evening, November 3, 2006 from 5:30 - 8:00 PM**, and will feature renowned local musical artist Tom Grant.

RSVP via email to: rsvp@orclinic.com, or call 503-963-2835.

Sincerely,

Louis Libby, MD

Craig Fausel, MD

Imaging Services Now Available at The Oregon Clinic

The Oregon Clinic is pleased to offer a new state-of-the-art center to service your patients' imaging needs. We now offer MRI, CT, Ultrasound, and X-ray. Because our facility utilizes the latest digital technology, accurate highest-quality imaging studies are immediately available to any Oregon Clinic physician, facilitating rapid diagnosis and excellence in patient care. Our professional and experienced staff are readily available to answer questions you may have regarding our new imaging center.

Digital Viewing System (PACS)

- Readings from EPIC's team of subspecialty Radiologists
- All digital imaging department rapidly providing electronic data to our physicians; same electronic delivery service will soon be available to providers outside The Oregon Clinic

X-ray

Available October 2, 2006

- Digital data transmits instantly
- Reduction in radiation exposure
- Shorter exam times
- Greater visualization of soft tissue and bone

64 Slice CT scanner

Available October 15, 2006

- Allows fast imaging (64 slices per second)
- Increased image quality (resolution)
- Decreased radiation dose in comparison to other CT scanners
- Lower IV contrast amounts, reducing side effects which may result from the use of contrast

Ultrasound

Available October 15, 2006

- State-of-the-art quality of images
- No ionizing radiation
- Real time imaging
- Visualize structure movement and live function in the body's organ and blood vessels

High Field 1.5 Tesla, 8 channel MRI system

Available December 1, 2006

- 8 channel allows increased signal and image quality, improving the diagnostic accuracy and quality of the exam
- 90% acoustic noise reduction as compared to most MRIs
- Short bore reduces patient anxiety and claustrophobia

Above: With our new CT scanner, scan time duration will be significantly shorter.

Below: Claustrophobia is a serious issue for many patients having an MRI. Our new scanner is about half the length of a standard MRI machine, improving comfort for the patient.

Easy & Convenient Scheduling

To schedule a patient for imaging services:

- Fax a completed exam referral form to 503-236-0786, OR
- Call the imaging scheduler hotline at 503-963-2990.

- Gastroenterology Endoscopy Center
- Imaging Center with 64 slice CT scan and 1.5 Tessa MRI, as well as digital radiography and ultrasound
- Sleep Laboratory
- Nuclear Medicine
- Clinical Laboratory (supplied via Providence Health System)
- Durable Medical Supplies (supplied via Providence Home Services)
- Rehabilitation Services (supplied via Providence Health System)
- Outpatient Pharmacy on First Floor

Commitment to Sustainability and Preserving Our Environment

Our building features sustainable principles in design, construction, and operation, with Silver certification in LEED (Leadership in Energy and Environmental Design) expected. Based on well-founded scientific standards, LEED emphasizes state of the art strategies for sustainable site development, water savings, energy efficiency, materials selection and indoor environmental quality. LEED recognizes achievements and promotes expertise in green building. LEED standards are high markers for sustainability, access to alternative transportation, optimized energy performance, reduction of water use and many other environmentally friendly aspects.

Exemplifying our commitment, we will be the first medical facility in Portland to harvest rain-water to reduce water waste. As good citizens of Portland and health care providers, we want to create a healthy community in which to live and work. Our clinics will be accessible by light rail, car, bicycle, and on foot, with the Gateway transit stop just steps from our entrance. The 200-space parking lot will offer plenty of room for patient parking.

The following Oregon Clinic divisions will continue to serve your patients from their existing location(s).
Ear, Nose & Throat, Medical Oncology, Neurology, NW Surgical Associates, Radiation Oncology, and Urology
